

Applications

Task automation with higher efficiency, better quality and improved consistency.

DOBOT Nova Series

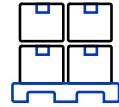

Collaborative robots designed specifically for the commercial sector

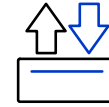

Welding

With seamline inspection before and after welding.

Palletizing

High performance solution with minimal setup time.

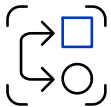

Loading and Unloading

Hi speed, precise and flexible.

Assembly

For precision assembly needs.

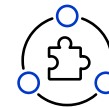

Bin Picking

Intelligent picking with vision sensors.

Gluing

Better gluing results with advanced motion algorithm.

Insertion

Accurate insertion of odd shaped components.

Polishing

Adaptive force control technology for complex surface curvature.

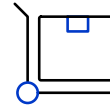

Quality Inspection

Massive efficiency gains over manual labor.

Screwdriving

Compatible with various screw types.

Transporting

General Purpose Transportation Solution.

Entertainment

High-Speed yet Smooth Photography
